OBJECTIVE

To obtain a dynamic role in a respected company where I can enhance my expertise and abilities. Aiming to utilize my experience in Software Development to support the achievements of company.

EDUCATION

BE in Computer Science Engineering

Pune Vidyarthi Griha's College of Engineering Nashik

⌚ DEC 2021 – June 2025

Score 65%

HSC

SIR DR. M.S. GOSAVI JUNIOR COLLEGE OF SCIENCE AND COMMERCE

⌚ July 2021

Score 79.67%

SSC

St. Lawrence Hight School And Junior College

⌚ March 2019

Score 76.60%

PROJECTS

Food and Shelter Finder (Jan 2024 – Apr 2024)

Technologies: HTML, CSS, JavaScript

Created a web platform to help individuals find food and shelter resources based on location, aiming to assist those in need in finding essential services quickly.

Detection and Prevention of IOT Botnet Attack using Machine Learning(BE Project)

Technologies: Python, Machine Learning, IOT, CNS

The project focuses on detecting and preventing IoT botnet attacks using machine learning techniques. It involves analyzing network traffic patterns to identify malicious activities and abnormal behaviors. Various ML models, such as decision trees and SVM, are trained on IoT attack datasets. The goal is to enhance cybersecurity by implementing real-time threat detection and mitigation strategies.
